

# Gesture controlled screens

Upgrade any digital signage!

**TAPGEST**

DIGITAL SIGNAGE IN YOUR HAND

# The most advanced Digital Signage Player

We've developed the most advanced player for digital signage and LED boards. Interactive software has countless creative marketing possibilities: it offers artificial intelligence or augmented reality for fun marketing.

The screenshot displays the TAPGEST digital signage management interface. On the left is a dark blue sidebar with navigation options: 'CAMPAIGNS', 'MEDIA', 'APPLICATIONS', 'DEVICES', and 'LOCATIONS'. The main content area is titled 'Device list' and features a search bar and a 'Filter' button. Below this, there is a grid of nine device cards, each showing a live camera feed of a digital signage screen in a mall. Each card is labeled 'Device 1' through 'Device 9' and includes a 'Device location' field. At the bottom, a pagination bar shows 'Showing 10 of 100 items' and a page navigation control with the number '2' highlighted.

# Gesture Control

Improve communication with your customers. We provide a wide range of applications controlled by hand and body movements. It's not only faster and more convenient than touching the screen, but also more hygienic.

# Tapgest Applications Marketplace

Use our player for an unlimited number of screens and purchase only apps that you like. Applications marketplace covers a wide range of interactive applications with countless marketing possibilities: it offers artificial intelligence or augmented reality for fun marketing.

## Few examples of what you can find on Tapgest

### Applications marketplace:

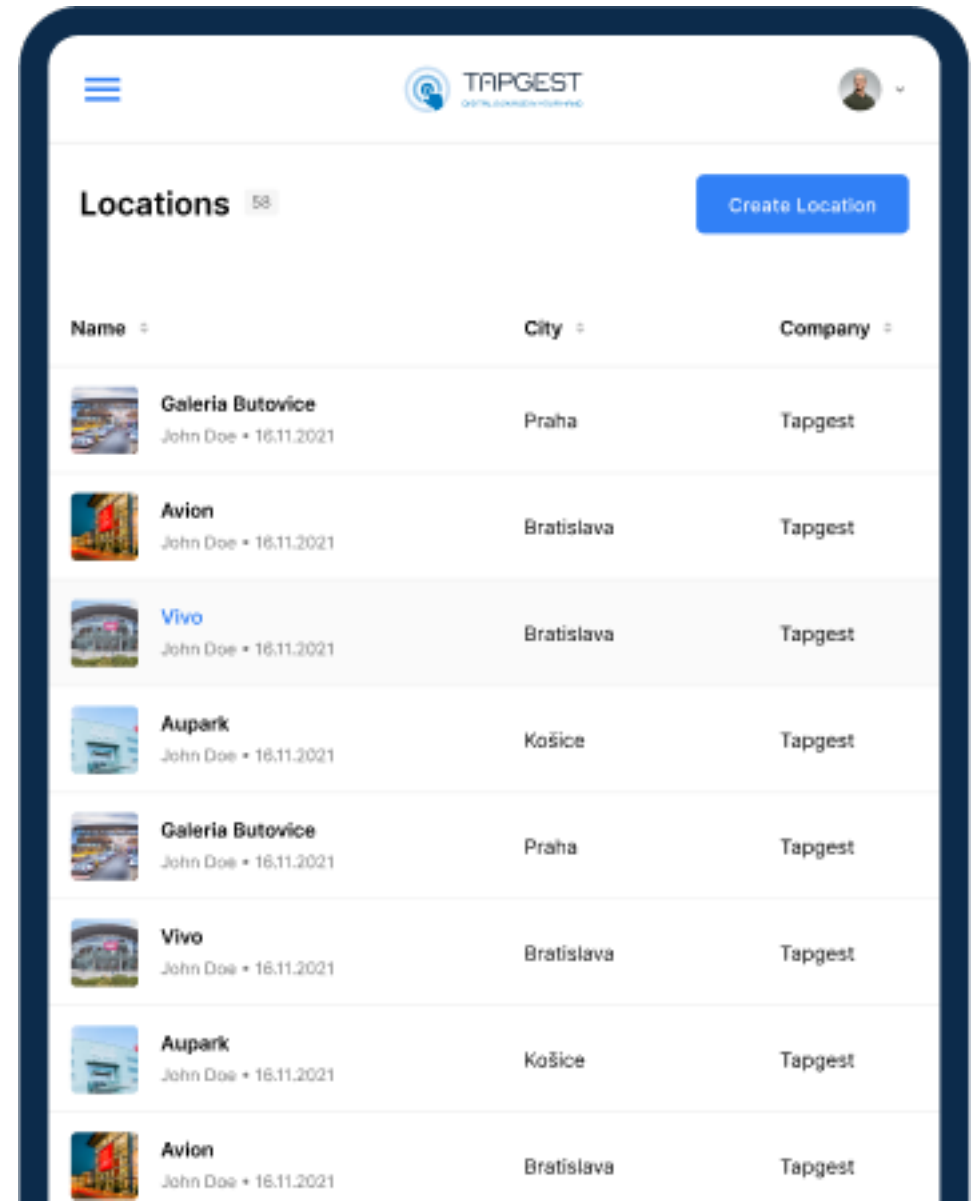

- stream video or show posts from social media in real time
- gesture controlled product showcase
- wheel of fortune controlled by hand gestures
- various games such as Augmented Reality photo booth
- Indoor navigation

...and many other applications

# Digital Signage Platform

Manage your digital OOH network quickly and efficiently: Tapgest digital signage platform makes it easy to remotely manage, plan and edit the advertising content on your screens. It's cloud based and accessible not only from a desktop or laptop, but also from mobile devices.

# Hardware

Upgrade your old digital signage with new capabilities like gesture control and augmented reality. All you need to do is to add a powerful PC and camera to your old screen and you can enjoy the endless possibilities of the Tapgest platform. Hardware varies based on the applications you would like to use: non-interactive ads, touchscreen applications, gesture controlled applications or augmented reality applications.

Player for static and dynamic ads	Player for touchscreen apps	Player for gesture controlled apps	Player for AR apps
Raspberry Pi 4 4GB, 64GB SD card	Khadas VIM3 Pro	iCore5, 8GB RAM, 120GB HDD, 8MPx camera @30fps	iCore7, 16GB RAM, 120GB HDD, 8MPx camera @30fps
